

Certificate II in Conservation and Ecosystem Management (AHC21020)

Restore Habitats. Protect Wildlife. Build Your Future.

Discover a nationally recognised qualification that takes learning beyond the classroom.

Designed for motivated Year 11 and 12 students, this unique program combines practical fieldwork, cultural learning and conservation projects to develop real-world skills while contributing to the protection and restoration of Southeast Queensland's natural environments.

What You'll Do

Students will gain hands-on experience in:

-  Restoring native habitats through revegetation projects
-  Identifying native plants and wildlife
-  Controlling environmental weeds and caring for Country
-  Safely using industry-standard tools and equipment
-  Working alongside environmental professionals and community partners
-  Learning from Traditional Owners through cultural and on Country experiences

Why Choose This Course?

- ✓ Nationally recognised VET qualification
- ✓ Contributes 4 QCE Credits upon successful completion
- ✓ Authentic fieldwork in diverse natural environments
- ✓ Develop practical workplace skills valued by industry
- ✓ Small group, supportive learning environment
- ✓ Build confidence, teamwork and leadership through real conservation projects.

Why Nudgee Beach?

At Nudgee Beach Environmental Education Centre, students don't just learn about conservation, they actively contribute to it. Working alongside experienced environmental educators and industry partners, students participate in meaningful projects including habitat restoration, wildlife conservation, cultural site management and environmental monitoring while developing skills that prepare them for future study, employment and lifelong environmental stewardship.
