

Investing for Success

Under this agreement for 2021

Nudgee Beach Environmental Education Centre will receive

\$5362.00 *

This funding will be used to provide artifacts to communicate the Centre's revised Mission

- Feed back from visiting teachers and teacher observations indicated that students struggled with the concept of what a wetland is and how they could protect the wetlands if they did not live near the bay. This information has allowed the centre to align with the Department's 2021 strategic plan of fostering curiosity connecting students to nature. This clearly aligns the Centre to the revised Mission priority of empowering nature scientists.

Our initiatives include

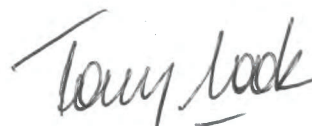

- Reprinting the artifacts on the wall in student spaces.
- Changing and reprinting all Centre documentation to align with the new vision.
- Developing new, age appropriate images for visiting students.
- Rebranding all marketing tools.

Our school will improve student outcomes by

Item	Quantity	Cost
Staff time to rework documentation, Pedegogical framework, curriculum assessment and reporting framework, lesson plans	4 days @ \$470.79	\$ 1890.00
Additional & replacement signage on GLA	2 signs @ \$656 ea	\$ 1312.00
Printing costs student artifacts, documents posters	9 @ \$30 per poster	\$ 270.00
Enabling staff to develop & film artifacts to support what a Nature Scientist would be doing in an age appropriate manner for different age groups.	4 days @ \$470.79	\$ 1890.00
		\$ 5362.00
